

Adobe PDF Viewer Error Fix

- 1) Go to your Desktop and Double Click on the **My Computer** icon.
- 2) On the **Menu Bar** select **Tools** and go down and select **Folder Options**.

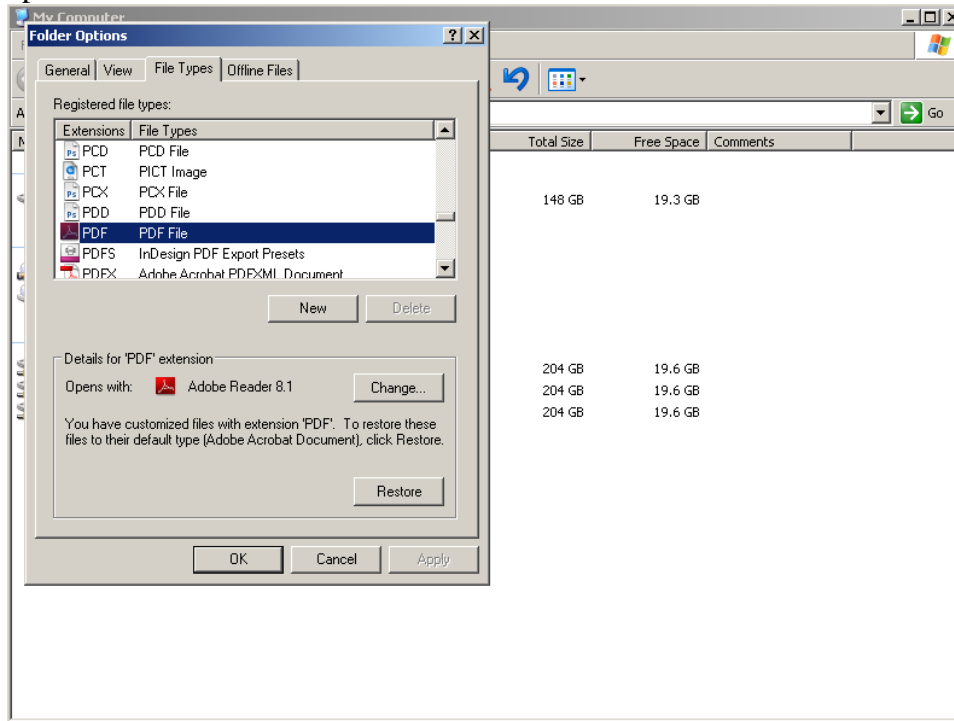

- 3) Select the **File Types** tab at the top of the Folder Options window.

Adobe PDF Viewer Error Fix

4) In the **Registered File Types** option list, scroll down and select **PDF – PDF File**. After **PDF** is highlighted, click the **Change** button beneath the **Registered File Types** option list.

5) After the **Open With** screen appears, make sure that **Adobe Reader** is selected and select **OK twice**. You should now be able to open the PDF file.
